

PORSCHE DESIGN

CHRONOGRAPH 718 SPYDER RS

UNFILTERED PERFORMANCE.

PURE ROADSTER FEELING.

The sound of 6 cylinders: right in your ears. The unbridled headwind: up close and personal. The details of the road: felt in every fibre of your body. Driving the new 718 Spyder RS is an unfiltered experience. This open roadster leaves compromise behind in fractions of a second, especially on demanding mountain stages and winding coastal roads. With its flat silhouette and characteristic streamliners, it stands out from the crowd — just like the Chronograph 718 Spyder RS, handcrafted in the Porsche watch factory in Solothurn, Switzerland. High-quality design features and a myriad of technical details linked to the vehicle stir pure emotions with just one glance at your wrist. Exclusively for owners of the new 718 Spyder RS.

**MOTORSPORT TECHNOLOGY FOR YOUR WRIST:
LIGHTWEIGHT DESIGN MADE OF TITANIUM.**

The 718 Spyder RS is designed to be as lightweight as possible, for adrenaline-filled agility. The Chronograph 718 Spyder RS also makes light work of it, thanks to its lightweight titanium case. The chronograph can also be customised, just like its motorised counterpart. The bezel with minute display or tachymeter matches the colour of the case and is available in natural titanium or Black titanium. The coloured ring can also be adapted to your personal taste — with the full selection of 718 Spyder RS standard, metallic and special colours; with an additional 114 'Paint to Sample' options, including numerous historic colours.

The 'RS' carbon dial and the 'GT' dial in Black provide enhanced sportiness — including Flyback lettering and an 'M' and 'H' in Racing Yellow for the minutes and hours. The mechanical gear indicator at 9 o'clock accentuates the motorsport heritage of the 718 Spyder RS with a chequered flag design and dynamic 'Spyder RS' lettering. The 'Spyder RS' lettering also adorns the badge that you receive with your Chronograph

718 Spyder RS in an exclusive product package. When you buy a 718 Spyder RS with the Weissach package and the matching chronograph, a 'Weissach RS' graphic with a stylised test track from the Weissach development centre graces the noble metal.

**MOTORSPORT TECHNOLOGY FOR YOUR WRIST:
LIGHTWEIGHT DESIGN MADE OF TITANIUM.**

- ① Lightweight titanium case
- ② 'RS' carbon dial or 'GT' dial
- ③ 'M' and 'H' in Racing Yellow for minutes and hours
- ④ Coloured ring selectable in all available Spyder RS colours
- ⑤ Bezel with minute display or tachymeter matching the colour of the case

BACK REVEALS ITS RS HERITAGE:

A ROTOR IN THE WHEEL DESIGN.

The design of the Chronograph 718 Spyder RS isn't the calm before the storm — it maximises the anticipation of the next corner. All it takes is one glance at the rotor, which enjoys optimal protection under a clear, sevenfold anti-reflective sapphire glass viewing window. The Chronograph 718 Spyder RS is an impressive piece with a rotor in the Spyder RS wheel look. The back of the Chronograph 718 Spyder RS with Weissach Package is crowned by a rotor in the style of lightweight magnesium alloy wheels. In the centre of both rotors, which are each available in the colours of Brilliant Silver, Aluminium (satin finish), Dark Silver, Neodyme, Indigo Blue, and Black: the end cap with the 'RS' logo in Brilliant Silver. For even more individuality you can find more model-specific rotor colours in our watch configurator. Additionally, you can choose up to 12 characters to be engraved on the back of the chronograph. Using the configurator, you can also add personalised text to be engraved on the accompanying plaque, such as the vehicle identification number of your 718 Spyder RS.

BACK REVEALS ITS RS HERITAGE: A ROTOR IN THE WHEEL DESIGN.

- ① Porsche Design Calibre WERK 01.240, COSC certified with flyback function
- ② End cap with 'RS' logo in Brilliant Silver
- ③ Glass bead-blasted titanium back in the same colour as the case
- ④ Rotor in the wheel design

CARE RATHER THAN HASTE: HIGH

PRECISION MOVEMENT, COSC CERTIFIED.

Framed by a glass bead-blasted titanium back in the same colour as the case, the Porsche Design Calibre WERK 01.200 is also COSC-certified — a distinction only awarded to watches of the highest accuracy. Yet, the highest demands are the ones we place on ourselves. This means that without exception, each and every chronograph is checked once again for accuracy by the Porsche watch factory before delivery. A first-class standard of quality that is only natural for Porsche Design. The movement has a flyback function that unites starting, stopping and resetting into a single operation. The only disadvantage of a chronograph with such a high-precision movement — it shows you exactly when it's time to finish your drive in the 718 Spyder RS and head home.

OPENS UP PURE EXCITEMENT. EVEN
WITH THE CONVERTIBLE TOP CLOSED.

- ① Leather straps made of genuine Porsche vehicle leather in Black with backing in Race-Tex in Black, including decorative stitching and 'Spyder RS' embossing at 6 o'clock
- ② Titanium clasp
- ③ Quick-change mechanism with push-pieces in the same colour as the case

On request, the chronograph can also be fitted with high-quality metal straps made of titanium.

OPTIMAL GRIP:

ALSO ON THE WRIST.

The most beautiful destination while driving an open 718 Spyder RS is becoming at one with the road and your surroundings. With its racetrack-tested GT chassis, the mid-engine sports car hugs the asphalt perfectly — just like the watch strap on your wrist. The leather straps underline the close connection to the 718 Spyder RS with Black, smooth vehicle leather and Black Race-Tex, including contrasting stitching in Carmine Red or Arctic Grey and 'Spyder RS' embossing at the 6 o'clock position. On request, the chronograph can also be fitted with high-quality metal straps made of titanium — just like the clasp. The motorsport character is also unmistakable when changing the strap. All straps* feature a quick-change mechanism and a folding clasp with push-pieces in the same colour as the case, ensuring the shortest possible pit stops.

* In markets without a configurator, the strap sizes M and L are included in the scope of delivery.

THIS IS NO EVERYDAY CAR.

THIS IS NO EVERYDAY WATCH.

At the beginning of the 1960s, Porsche continued to further develop its successful concept of the legendary 550 Spyder and successor models with the 718 RS 60 Spyder — causing a sensation in several mountain and endurance races. With the 718 Spyder RS, this unique heritage can now be experienced on every journey. Tradition also plays an important role in the production of the Chronograph 718 Spyder RS. In the spirit of the creator and designer Prof. Ferdinand Alexander Porsche, who once said: "If we wanted something, we had to do it ourselves."

And so these extraordinary timepieces are created in a very special place — by hand and with great attention to detail — in the Porsche owned watch factory, founded in 2014 in Solothurn, Switzerland. This is where the expertise of sports car designers and watch experts converge to create a perfect symbiosis between the two fields and, in so doing, combine the highest aesthetic standards with unbeatable performance and precision craftsmanship. The result: exceptional watches that extend the fascination of Porsche far beyond winding coastal roads and demanding mountain stages.
